Sheridan County Commissioners
Planning & Zoning Commission
224 S. Main
Sheridan, WY 82801

Dear Commissioners,

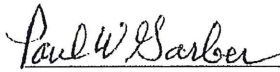

We would ask that you approve Ramaco Carbon's request for a rezone of their property from agriculture to I-2.

Over the past years, Sheridan County has worked diligently to achieve planning that protects our way of life and the uniqueness and beauty of the area. That plan has also worked to achieve a means by which reasonable and controlled growth may occur.

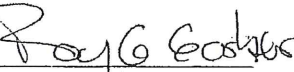

Ramaco's proposal to build a research park and light manufacturing facility in this area, in our opinion, fits the criteria for I-2 zoning. The diversity of this project appears to possibly provide a widening base for employment and an increase to our tax base which is a positive attribute in which the entire Sheridan community may benefit from.

We appreciate your time and effort and encourage you to support this change in zoning.

Respectfully submitted,

Paul W. Garber, President

David V. Garber, Vice President

Roy G. Garber, Sec/Treas.
